

PHYSICIAN-ASSISTED AUTISM DIAGNOSTIC (PAAD) CLINIC MODEL STATE EXPANSION

The Arc of Madison County's PAAD Clinic model...

- Serves children ages 2 through 5
- Accepts Medicaid, many insurances (varies by location), and private pay
- Keeps out-of-pocket costs low for families
- Partners with physicians

We complete a full battery of assessments and provide the physician with a comprehensive evaluation report, which includes an individualized list of recommendations for the family. The physician then decides the final diagnosis (using the DSM-5 checklist) and provides the results to the family for continuity of care.

The following locations have also adopted the PAAD Clinic Model:
